1. Name: GEETA THORAT

Diagnosis: Breast Cancer

I was detected of breast cancer a month ago and was visiting different places for affordable treatment as I come from a economically weak background, my family was not able to afford the treatment, in this search we came across Orchids Breast Health Clinic, after consultation with Dr. Koppiker I was so happy to know that this disease is completely curable and I will be free of this disease within a year or two with proper treatment and care, Dr. Koppiker also told me I could avail the treatment free of cost as he was well aware of my financial status. Prashanti Cancer Care Mission took care of all my treatment expenses, my chemotherapy drugs were completely free, I could avail the day care in their set-up for free.

I am glad that I was introduced to Dr Koppiker and Laleh Madam and their whole team. I would specially like to thank George brother who is in-charge for the chemotherapy as he takes care of his patients very well.

Once again I would like to thank the whole team of Orchids for the wonderful work they do and save lives.

2. Name: KALPANA RUKE

Diagnosis: Breast Cancer

I am Mrs. Kalpana Ruke, a cancer survivor and this was possible only because of Dr. Koppiker and Laleh madam, their constant support care and love. Cancer word itself is enough to create a havoc and depression in and around you, but having a supportive family and the best doctor is all what a cancer affected individual needs and I was blessed to have both. I want to thank Dr Koppiker for his constant support, his availability and guidance. My chemotherapy cycles were so smooth that I didn't even realise, the day care centre at Orchids is the best, the staff here is very caring and supportive and the ambience is just perfect, I would really like to appreciate Dr. Chetan Deshmukh and George brother for their work.

I wish all the very best to the whole team of Orchids. God bless

We would like to ~~THANK~~ our
Donors & Supporters

Warm Regards,
Ms. Laleh Busheri
CEO
